FISH FOREVER - SCIENCE & TECHNOLOGY TEAM

3/24/2021

Tool Objective

This tool summarizes information collected through the Fish Forever Household Survey (HHS). The HHS contains defined-answer questions assessing respondents' livelihoods, engagement with the local fishery, resilience to economic shocks, social capital, knowledge of fishing regulations, attitudes towards and participation in fisheries management, and perceptions of current management approaches.

Metadata

Here is a the metadata associated with the HHS dataset. Please refer to the HHS Guidance document (https://portal.rare.org/wp-content/uploads/2021/01/HHS-Instrument_updated_011221.pdf) for the survey questions and specific answers. Each HHS question starts with a number (1 to 83). Other columns are information regarding administration levels, management levels, date of survey, submission ids, etc. Seven questions (Q7, Q14, Q15, Q44, Q45, Q48, and Q69) have multiple choice answers and appear at the end of the dataset.

The following is the list of unique column names for the entire HHS data and associated **metadata** (variable types, answer codes, notes):

id: Unique numeric identifier

country: Country name

level1_name: Subnational government name (usually State or Province)

level2_name: Local government name (usually Municipality or District)

level3_name: Sublocal government name (usually Subdistrict)

level4_name: Community or Village name

level4_id: Community or Village unique ID linked to level4_name

lat: Latitude of the Community in decimal degrees

lon: Longitude of the Community in decimal degrees

ma_name: Managed Access Area name (proposed or established)

ma_area: Managed Access Area in hectares

ma_status: Managed Access Area status (Proposed or Established)

reserves: Number of reserves within the the Managaed Access Area

reserve_status: Reserve status (Proposed or Established)

username: User name for entering data in FastField (no available in data dowloads) (CONFIDENTIAL, not shown)

submissionid: Unique submission Id from FastField

updatedat: Submission date as Factor in year-month-day:time format ("2019:-07-12T03:01:46")

startformtimestamp: Start time of the survey as Factor in year-month-day:time format ("2019:-07-12T03:01:46")

endformtimestamp: End time of the survey as Factor in year-month-day:time format ("2019:-07-12T03:01:46")

1_interviewer: Name of interviewer (CONFIDENTIAL, not shown)

2_affiliation: Affiliation of interviewer

3_community: Name of community or village

4_ma_r_mb: This was a filtering question and answers weren't recorded in the database

5_hh_status: Household status of interviewed person

6_gender: Sex of the interviewee

7_gender: Factor, 2 levels (Sex: M, F), NA (not answered), [multiple choice answer]
7_age: Integer, NA (not answer), (multiple choice answer), [multiple choice answer]
7_relationship: Factor, 10 levels, NA (not answered), [multiple choice answer]
7_education: Factor, 6 levels, NA (not answered), [multiple choice answer]
8_religion: Religion of the household head (dropdown list)
8_religion_other: Other religion not in the list above
9_region_member: Region identification: 1 (Yes), 0 (No), NA (not answered)
9_region_name: Region name
